

Keeping up with Technology

We haven't talked with you in quite some time, and I wanted to let you know that we've missed your business.

We thought you might be interested in taking another look at some improvements we've recently made. For one, our Industrial Computers now have Pentium 4 Processors. This will allow you to keep up with today's demanding operating systems and be compatible with the most up-to-date software packages.

On the chance that you've not found another Industrial Computer Supplier that has met all your expectations and needs, I've included a link to some updated information on our newest Pentium 4 Industrial Computers.

Please let us know if we can do anything to make our services more helpful to your company.

Cordially,

A handwritten signature in black ink that reads 'Brandi Murray'.
